

The diagram illustrates the addition of orientation to a map. On the left, a map of a coastline is shown with a North arrow pointing upwards, labeled 'N'. To the right of the map is a compass rose, which is a circle divided into four quadrants by a vertical and a horizontal line. The top-left quadrant is white, the top-right is black, the bottom-left is white, and the bottom-right is black. A horizontal line connects the North arrow to the compass rose.
